

## Appendix 1. LLPR External Advisory Board

Innovation comes from the collision of different ideas and different ways of thinking. An External Advisory Board (EAB) was formed to provide stakeholder oversight for the LLPR. The EAB consisted of individuals with a broad range of backgrounds, a clear understanding of the needs and uses of the data, and who represent both the clinical and research prosthetic community. The role of the EAB was to review and inform the various tasks and steps in the project. This body informed both the scientific mission and stakeholder relations.

### *LLPR External Advisory Board Members*

Expertise	Name	Affiliation and Position
Registry Administration	Greg Lange, MS	<del>Simbex</del> : Chief Business Development Officer
Patient Advocacy	Ashlie White	Amputee Coalition: Chief Programs Officer
